

MUHAMMAD UMAR

Software Engineer | AI/ML

umar1okie@gmail.com | +92 300 9034444 | Peshawar, Pakistan | [LinkedIn](#) | [GitHub](#)

SUMMARY

Software Engineer specializing in AI/ML, computer vision, and full-stack development. Proven ability to build production-grade ML pipelines, real-time systems, and REST APIs. Experienced in Python, Django, React, TensorFlow, PyTorch, and Agile environments.

EDUCATION

Bachelor of Science in Computer Science | FAST NUCES, Peshawar, Pakistan

Sep 2020 – Jan 2025

PROFESSIONAL EXPERIENCE

Software Development Intern | Softech Digital Group | Remote

Nov 2025 – Mar 2026

- Built real-time face recognition system (Django, React, InsightFace) processing verifications day; added WebSocket live verification reducing feedback time from seconds to milliseconds.
- Designed async ML pipeline using Celery + Redis, cutting API response latency by 40%; secured data with Fernet encryption and role-based access control.
- Engineered automated payroll system; generated 100+ PDF payslips and Excel reports using ReportLab and openpyxl.

AI/ML Intern | Code Club | Peshawar, PK

Jun 2025 – Jan 2026

- Processed different record datasets with feature engineering and EDA; improved model accuracy by 15% via cross-validation and hyperparameter tuning, reducing experimentation time by ~30%.
- Built reusable ML pipelines enabling faster model deployment and experimentation across multiple projects.

Machine Learning Intern | Bytewise Fellowship | Remote

Jun 2024 – Sep 2024

- Developed end-to-end ML workflows (data preprocessing, training, evaluation using F1-score and confusion matrices); collaborated in Agile sprints using GitHub.

PROJECTS

EchoMind – Real-Time Audio Transcription | Python, OpenAI Whisper, WebSockets, REST

- macOS service with <500ms streaming latency using chunk-based pipeline for continuous long-session transcription.

HRMS Face Recognition Attendance System | Django, PostgreSQL, Celery, Redis, InsightFace, JWT

- Microservice architecture separating ML inference for scalability; high accuracy via optimized InsightFace vector matching.

Automatic Number Plate Recognition (ANPR) | YOLOv8, Tesseract, EasyOCR, OpenCV

- Real-time video stream detection with improved robustness under low-light and motion conditions.

Other ML Projects | TensorFlow, PyTorch, Scikit-learn, NLTK, Sentence Transformers

- Image Classifier (CNN+LSTM, 78%→88% accuracy) | Spam Classifier (TF-IDF + Naive Bayes, ~95% precision) | AI Chatbot (TensorFlow, NLTK) | Question Categorizer (Sentence Transformers + SVM).

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL **Frameworks:** Django, Node.js, Express, React, TensorFlow, PyTorch, Scikit-learn, OpenCV

Databases: PostgreSQL, MySQL, MongoDB **Tools:** Git, Celery, Redis, Jupyter, VS Code, Docker

Concepts: Machine Learning, Deep Learning, Computer Vision, NLP, REST APIs, Microservices, CI/CD, Data Pipelines, Model Deployment, Agile, OOP

CERTIFICATIONS

AI/ML Internship Certificate - Code Club | **Internship with Distinction** - Softech Digital Group
